

Reservoir drawdown and the downstream flood: levels, pool area/volume, daily balance and the hypsometry used

- SWOT outlet (0 km)
- ▲ Rozumivka gauge (248 km)
- ◆ G-REALM (111 km; a check, not an anchor)
- Nikopol post (160 km, press)
- ✕ ICESat-2 passes
- Kherson stage (downstream)

- pool volume under the sloped surface (DEM, km³)
- pool water area (DEM, km²)
- ▼ Yi et al. 2025, Sentinel-1 reservoir area (authors' archive, Zenodo 14639520)

- DniproHES inflow Q_{in}
- effective release from the pool ($Q_{in} - dV/dt$)
- new water stored downstream (corridor + Inhulets, MC medians)
